## Components of Gender and Sexual Identity

| <b>1.</b> 9   | Sex:  | Our<br>O | biolo | gical | "packa<br>O | age" (d     | chrom | osor | nes, g<br>O | enitalia | a, horm<br>O              | ones,     | etc.)<br>O  |  |
|---|---|----------|-------|-------|-------------|-------------|-------|------|-------------|----------|---------------------------|-----------|-------------|--|
|   | 0   |          | 0     | 0     |             | 0           | 0     | 0    |             | 0        |                           | 0         |             |  |
| Female  |   |          |       |       |             | Intersex    |       |      |             |          |                           |           | Male        |  |
|   | 2. Gender Identity: The psychological knowledge of our gender (regardless of "the package") |          |       |       |             |             |       |      |             |          |                           |           |             |  |
| 0   | 0   |          | 0     | 0     | 0           | 0           | 0     | 0    | o (         | 0        | 0                         | Ο         | 0           |  |
| Woman Neither/Both/Genderqueer/Other  |   |          |       |       |             |             |       |      |             | Man      |                           |           |             |  |
|   |   |          | -     |       |             |             |       |      |             | _        | nder usi<br>nconscio<br>O | _         | mmonly<br>O |  |
| Feminine  |   |          |       |       |             | Androgynous |       |      |             |          |                           | Masculine |             |  |
| <b>4. Sexual Orientation:</b> Who we are attracted to (attraction may be affectional, romantic or erotic) |   |          |       |       |             |             |       |      |             |          |                           |           |             |  |
| 0 (   | 0 0   | U        |       | Ο     | 0           |             | 0     | C    | ) 0         |          | 0                         |           | 0 0         |  |
| Attracted to Men Bisexual/Pansexual/Asexual Attracted to Women  |   |          |       |       |             |             |       |      |             |          |                           |           |             |  |
| 5. Sexual Behaviors: What we do sexually  |   |          |       |       |             |             |       |      |             |          |                           |           |             |  |
| 0   | 0   | 0        | 0     | Ο     | U           | 0           | 0     | 0    | U           | О        | 0                         | 0         | 0           |  |
| With Men With Both/With No one/With Anyone With Wome  |   |          |       |       |             |             |       |      |             |          | h Women                   |           |             |  |

"There isn't really one simple way to sort out males and females...humans like categories neat, but nature is a slob." - Alice Dreger, Professor of Medical Humanities and Bioethics at Northwestern University
